PROFESSIONAL SUMMARY

Product-focused technology professional with experience across product operations, product management, frontend development, user and market research, requirements documentation, product evaluation, and Agile delivery. Experienced in taking products from business requirements and market validation through feature definition, cross-functional collaboration, testing, client feedback, and implementation. Strong technical foundation in frontend development enables effective communication with designers and engineers and practical evaluation of digital products.

CORE PRODUCT MANAGEMENT SKILLS

Product Discovery & Research | Requirements Gathering | PRDs & Feature Specifications | Product Evaluation | User & Market Research | Product-Market Fit | Feature Prioritization | Agile/Scrum | Cross-functional Collaboration | UAT & Product Testing | Stakeholder Communication | Product Operations | Technical Collaboration

WORK EXPERIENCE

Product Manager | Oct 2025 – Present | Int+ Technology

- Manage and support digital products from discovery and requirements definition through evaluation, delivery, testing, client feedback, and continuous improvement.
- Translate business and user needs into clear product requirements, feature specifications, user flows, and implementation-ready documentation.
- Conduct user and market research to assess product-market fit, identify customer needs, validate product opportunities, and inform product decisions.
- Evaluate products against business requirements, usability expectations, and market needs before recommending suitable solutions to clients.
- Work closely with designers and developers to clarify requirements, review implementations, track product progress, and support delivery of approved features.
- Coordinate product feedback, testing, issue identification, and refinement to ensure delivered features align with agreed requirements and expected outcomes.
- Support client-facing product recommendations by connecting identified business problems with relevant product capabilities and implementation opportunities.

Product Operations | May 2025 – Sept 2025 | Int+ Technology

- Supported product operations, requirements gathering, product research, documentation, testing, and coordination across product delivery activities.
- Worked with product, design, and engineering stakeholders to understand requirements and translate business needs into actionable product tasks.
- Participated in product reviews, market research, feature evaluation, and feedback analysis to identify opportunities for product improvement.
- Supported QA/UAT activities by reviewing features against requirements, documenting issues, and communicating findings for resolution.
- Contributed to product documentation, workflow analysis, and Agile delivery processes while developing progressively broader product management responsibilities.

Frontend Developer | July 2024 – Present | GFA Technologies

- Collaborate with product, design, and engineering stakeholders to translate requirements and UI/UX concepts into responsive digital experiences.
- Develop and maintain responsive features for mobile and desktop platforms using HTML, CSS, JavaScript, React, and Next.js.
- Contribute ideas for new features and improvements based on client feedback, user interactions, and product observations.
- Integrate RESTful APIs and collaborate with backend developers to improve product functionality and deliver new features.
- Use Git and modern development practices to manage code changes, resolve issues, and maintain reliable product releases.
- Develop reusable templates and interfaces for SMEs and business owners, strengthening practical understanding of user needs and product usability.

Frontend Developer (Intern) | January 2024 – June 2024 | GFA Technologies

- Built and refined frontend interfaces, debugged application issues, collaborated with designers, integrated APIs, and contributed feature improvement ideas based on user and client feedback.

Graduate Intern (National Youth Service Corps) | April 2024 – March 2025 | Kwara Poly Secondary School, Ilorin, Kwara State

- Designed and delivered structured learning experiences, coordinated groups, monitored progress, and collaborated with staff on planning and student development initiatives.

SELECTED PRODUCTS MANAGED

QuantityTech— AI-powered quantity surveying and estimation platform focused on faster estimating, collaboration, precision, and compliance. Product work includes requirements, product evaluation, market research, and delivery coordination.

ChurchWatch— Church management product supporting financial accounting, HR, and administrative operations across Directors/Super Admin, Branch or Lead Pastors, Accountants, and Branch Administrators.

Expense Management System — Digital expense-management solution focused on organizing, tracking, reviewing, and managing business expenditure workflows.

Transaction Tracking — Product focused on payment/transaction tracking and operational visibility.

LegalTech — E-signature platform positioned around secure document workflows with built-in forensic AI capabilities.

EdApp — Education administration product supporting school operations and fee reconciliation workflows, including role-based access and administrative processes.

EDUCATION

B.Sc. Plant Science and Biotechnology — Ekiti State University, Ado Ekiti, Ekiti State | February 2024

Second Class Honors, Upper Division

O' Level (WASSCE & NECO) — FSTC, Usi Ekiti, Ekiti State | 2016–2018

First School Leaving Certificate — Tinuola Maximum Schools, Ado Ekiti | 2007–2012

CERTIFICATIONS & TRAINING

- Professional Product Management Certification — AQskill | 2026
- Data Protection Officers Certification — Nigeria Data Protection Commission (NDPC) | 2026
- Product Management Basics — Pendo | 2025
- Professional Frontend Development Certification — Coursera and Meta | 2023
- Frontend Development Certification — Ekiti Digital Skilling Academy | 2024
- Software Development (Frontend) — Women Techsters Fellowship (Tech4dev) | 2024
- Introduction to JavaScript — Great Learning | 2024
- Cisco Certification — Cisco | 2018

TECHNICAL & COLLABORATION SKILLS

Product/Delivery: Agile, Scrum, Product Operations, Product Discovery, Requirements Documentation, PRDs, UAT, Product Testing, Jira, Trello, Slack, Kanban Boards

Technical: JavaScript (ES6+), TypeScript, HTML, CSS, React, Next.js, Tailwind CSS, Bootstrap, SASS/SCSS, Redux, React Query, Context API, REST APIs, Git, GitHub, Vercel, Firebase

Additional: User & Market Research, Stakeholder Communication, Cross-functional Collaboration, Problem Solving, Documentation, Microsoft Office

SELECTED FRONTEND PROJECTS

- Dimp — Booking and business management platform; built responsive interfaces, integrated APIs, and improved user experience.
- Dimp Admin Dashboard — Internal admin system; developed scalable dashboard components and state-management workflows.
- RemsTech — SME business-building platform; contributed to user-facing features and core service integrations.
- Unleash — Digital product platform; built reusable components and contributed to scalable frontend architecture.
- BelieversWebsite — Responsive event website with registration and accessibility considerations.
- Honsurg — E-commerce interface for showcasing and selling footwear products online.
